

CAPOLAVORO

## CAPOLAVORO WRIST MEASURER

### EXPLANATION

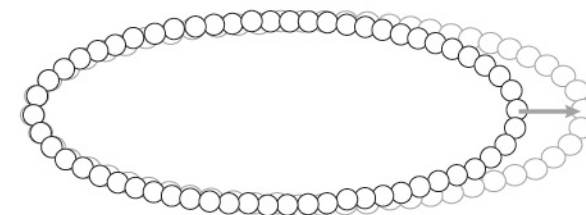

Print out this bracelet size template without 1:1 scaling and cut it out along the dotted line.

The numbers should now be on the outer side. Place the paper wrist measurer on your arm, wrap it around your wrist and push the pointed end through the slit (which you have cut under the logo) on the other end so that it lies comfortably on your wrist.

The number next to the opening is your wrist circumference.

You can also use a tape measure or place a piece of string around your wrist and measure the length using a ruler.

PLEASE NOTE: The Capolavoro wrist measurer only provides an approximate measurement and is not 100% accurate.

Cut out along the dotted line.

### REFERENCE DIMENSION

Exactly 5 cm long
